Help us find your house in an emergency!

The Hebron Fire Department is selling reflective 911 address signs. Our goal is to get the Hebron community well marked for the safety and well-being of all. Time is a critical factor for emergency services. Every minute lost to inadequately marked homes can make the difference between life or death, and a partial or total property loss.

Chapter 174 of the Hebron town ordinances titled Buildings, Numbering of, requires all properties be numbered to “promote public safety and convenience by providing a rational street numbering system whereby addresses may be identified with the ease and speed which is essential to the quick response of emergency services, including police, firefighting and medical care”. These reflective number signs are an invaluable tool in achieving that goal.

HFD recommends the following for installation:

1. Use a 4"x4" post, 6-foot steel stake or sufficiently extended mailbox post installed beside the driveway on the frontage of the property.
2. The post should be placed no more than 5 feet back from the edge of the road.
3. The purpose of the sign is to be easily visible to approaching emergency responders.
4. The reflective sign can be attached either vertically or horizontally approximately 4 feet high to be above the snowbank line.
5. If you live on a common driveway, please place a reflective sign at the street as well as a second sign where your driveway splits off the common drive.

Reflective address forms are available at Hebron Fire Department, 44 Main St.

Thank you!
