Subject: Housing Plan

To our town planning people,

I saw the article in the Chronicle about the affordable housing plan and just wanted to say how glad I was to see the ideas and principles laid out in the Plan for Housing Choices it referenced. We need denser housing options and more lower cost housing options. I have family from Pennsylvania who really wanted to move to this area to be closer to my household, but they ultimately had to stay in PA and buy a house there; nothing around here was within reach of their budget, either rental or purchase. So it's a personal issue for me. I am confident we have plenty of room to build ecologically sound housing with affordability in mind while staying the semi-rural town everyone here enjoys, making it better for everyone in the process. A walkable and peopled little downtown with mixed homes and businesses is the future we need.

Thank you.
