Joint Park Operations with Surrounding Towns

- Joint Purchase Glastonbury
 - Bobcat
 - Toro 170 Sprayer
- Shared Equipment- Kubota Mini Excavator
 - Andover, Bolton, Chaplin, Columbia, Coventry, Hampton, Lebanon, Windham, and Vernon

Park Operations

What are our Goals?

- Maintain top quality facilities for the Community.
- Ensure the highest level of safety for all participants and reduce injuries.

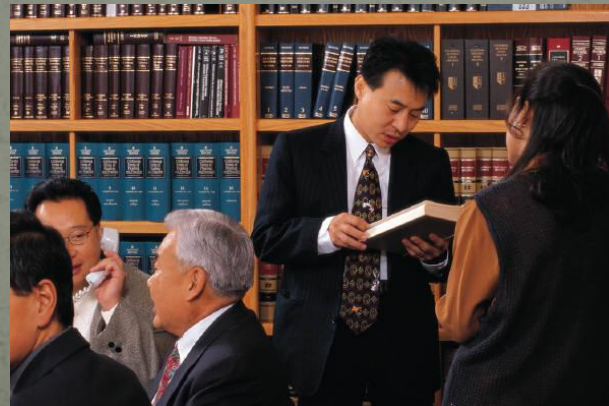

The Connecticut legislature passed a law (P.A. 09-56) banning lawn care pesticide applications on the grounds of day care centers, elementary and middle schools (grade 8 and lower) as a result of residents' concerns about children's health and the environment. This ban went into effect for day care centers on October 1, 2009 and for K-8 schools on July 1, 2010.

Public Act No. 12-155

AN ACT CONCERNING PHOSPHOROUS REDUCTION IN STATE

WATERS. no person shall apply fertilizer, any soil amendment, or any compost that contains phosphate to an established lawn, except when: (1) A soil testing method approved within the previous two years indicates the soil is lacking in phosphorus and fertilizer, soil amendments or compost containing phosphate is needed for the growth of such lawn, or (2) such fertilizer, soil amendment or compost containing phosphate is used for establishing new grass or repairing such lawn with seed or sod.

Integrated Pest Management

The Parks Department uses an integrated pest management plan. This plan entails using common sense and good cultural practices in the maintenance of turf.

Keys to Success

- Maintain the site history
- Identification of the source of any problems
- If problem-what is the cause (i.e., disease, insect, weed)
- Determination of the tolerance level for pest
- Regular Scouting
- Determination other means available then pesticides
- Identification and implementation of cultural techniques to manage pest ems

Town of Hebron Parks and Recreation Department

The Town maintains the following native soil fields:

- 4 Softball fields
 - 9 Multi-use fields
 - 3 60 ft. Baseball fields
 - 2 70 ft. Baseball fields
 - 2 90 ft. Baseball fields
-
- Plus- The Town and school grounds and green space turf requiring mowing weekly maintenance totals 200 acres.
 - Open space management over 2,000 acres
 - 10 miles of trail space

All of the grounds maintenance is done in house by two full time,
three 36 weeks seasonal staff members and the Director

Mission

- The mission of the Town of Hebron Public Works Department is to provide a safe and well maintained infrastructure and transportation system by keeping current with modern road maintenance technologies and production methods while adapting to the changing environment of a growing community.

PUBLIC WORKS

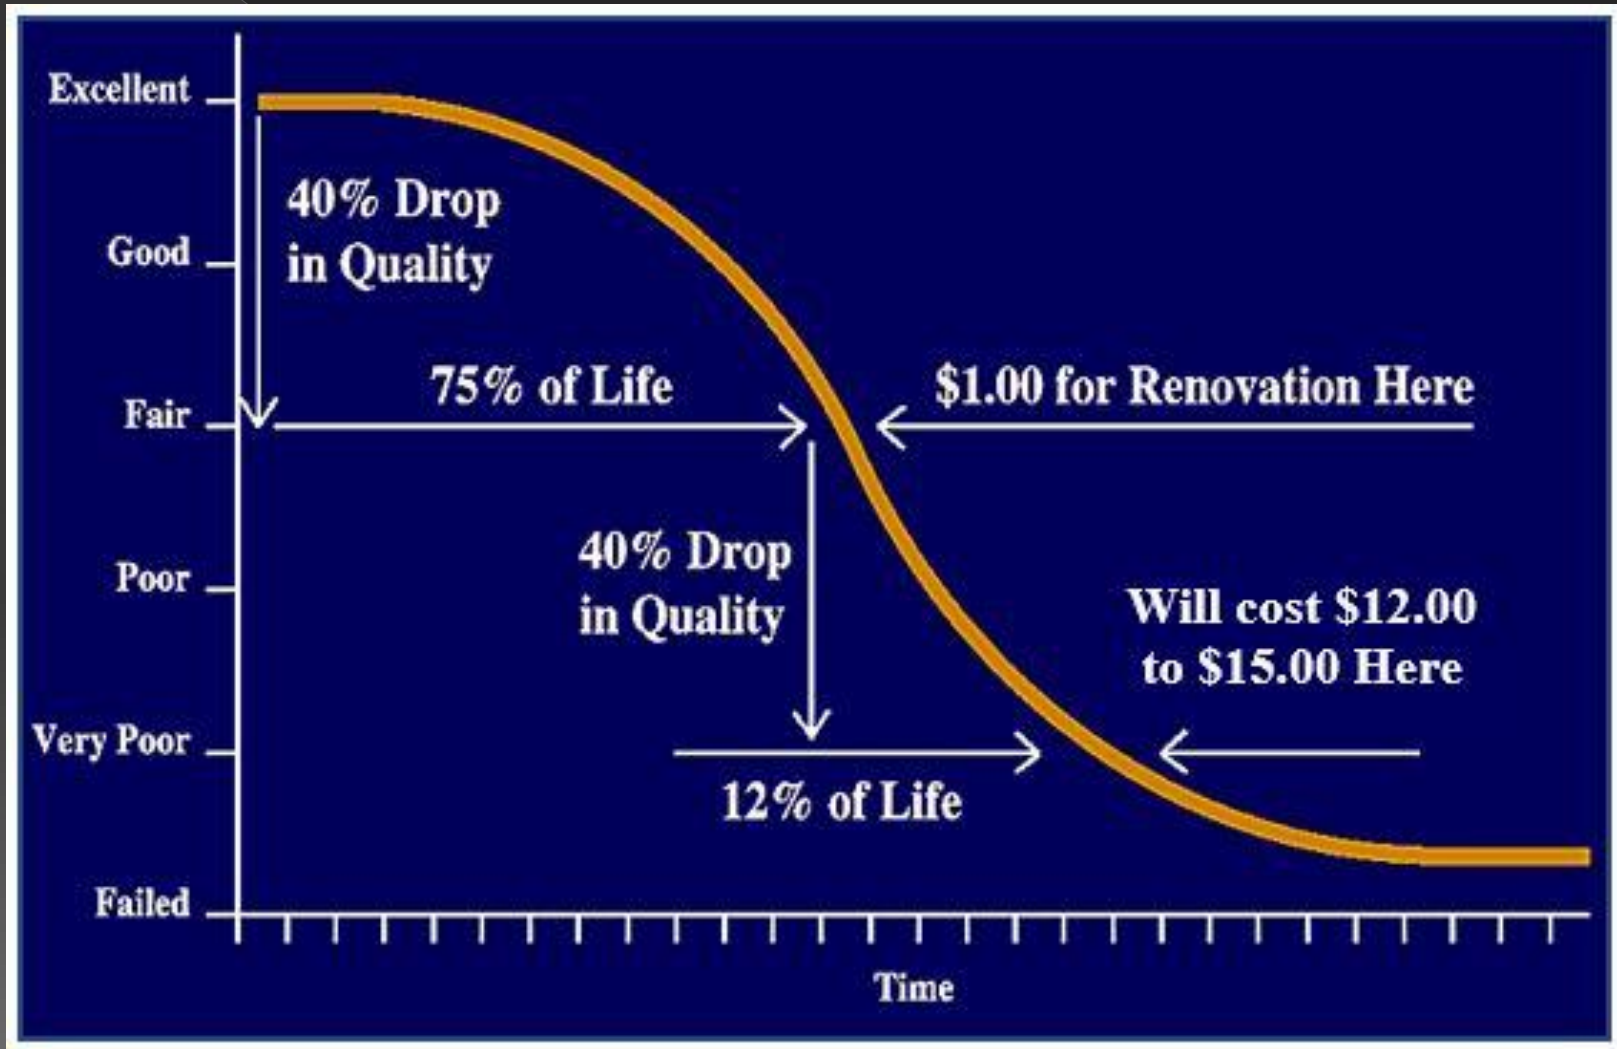

FIRST RESPONDER

80 Miles of Roadway

- Towns Largest asset – approximately \$34 Million
- Cost less to maintain the roads before they deteriorate.
- Example: Chip-seal \$1.85 SY + leveling
- Thin overlay \$7 SY
- Reclaim and Pave approximately \$18 SY
- Goal is to keep roads in a better condition

Pavement Deterioration Curve

Pavement Treatments

- Chipseals \$1.75 SY
- Micro Seal/Slurry Seal \$3.25 SY
- Cape Seal \$4.85 SY
- Cold In Place \$6.25 SY
- Hot In Place \$4.50 SY
- 1.5 Overlay \$7 SY
- Reclaim and Pave \$18 SY

Road Repair

- CIP funded \$285,143
- Road Repair Materials \$270,321

- ◎ Jim Riley
- ◎ Mark Falade

- The Town of Hebron owns and operates a wastewater collection system that includes approximately 17 miles of gravity sewers and force mains and 9 sewage pump stations.
- The town installed the public sewers in the early 1990s in response to an order from the CT department of Environmental Protection to remedy areas of septic system failures.
- The collection system is comprised of sewers along the following roads: Route 85 from Town Hall south to Crouch Road, Crouch Road, North Pond Road, Brennan Road, portions of Hope Valley Road, Slicer Drive, portions of Millstream Road, Kinney Road, portions of Wall Street, Main Street (this includes RHAM Jr and High School, Hebron Elementary school and the businesses in the center of town) and Wellswood Road. Sewers are installed in the Amston Lake District area.

- Recently the Amston Lake area from the Town of Lebanon has connected to the Hebron collection system.
- The present average sewage flow from the town of Hebron is about 180,000 gallons per day.
- All sewage is pumped to the Town of Colchester and then pumped to the Town of East Hampton where the treatment plant is located.
- East Hampton Joint facilities maintains the system for the Town of Hebron.

Key Issues

- The Town of Hebron sewerage infrastructure is over 28 years old.
- Many mechanical components of the system are designed to a 20 -30 year life cycle.
- Recently the WPCA has replaced some of the equipment including pumps, controls, valves, and transfer switch components.
- There are 9 pumping stations and 57 Grinder pumps
- Flows within the system have increased during rain events bringing into question the existence of infiltration or inflow.

TABLE 7-1
HEBRON COLLECTION SYSTEM CAPITAL IMPROVEMENTS PLAN
Update: 09-04-18: TWO-PHASED APPROACH TO PUMP STATION UPGRADES

Item/Equipment	2017 Budget Design \$	2017 Budget Construction \$	Target Replacement/Upgrade Year ⁽¹⁾
